Professional Summary

Results-driven Full-Stack Developer with hands-on experience building and maintaining scalable production applications across modern web ecosystems. Proven expertise in React.js, Next.js, TypeScript, Supabase, and cloud integrations including Google APIs, OAuth, and third-party services.Recently contributed to a real-world SaaS product at Constructive Curiosity, delivering complex features such as Google Calendar synchronization, authentication systems, notification services, and cloud-based integrations. Strong understanding of system architecture, API design, database management, and performance optimization.Currently continuing as a remote contractor, collaborating on production systems and delivering high-quality, maintainable solutions. Passionate about clean code, problem-solving, and building impactful digital products.

Technical Skills

Languages:
JavaScript, TypeScript

Frontend:
React.js, Next.js, Tailwind CSS, HTML, CSS, Bootstrap

Mobile:
React Native (iOS & Android)

Backend:
Node.js, Express.js, PostgreSQL, Supabase, GraphQL

Cloud & Integrations:
Google Cloud Console, OAuth 2.0 (Google & Apple), Google Calendar API, Twilio API, Azure Integration

API & Systems:
REST APIs, Authentication Systems, Role-Based Access Control

Tools & Platforms:
Git, Jira, Slack, Vercel, Figma

Professional Experience

Full-Stack Developer Intern → Remote Contractor

Constructive Curiosity, USA
Jan 2026 – Present

• Developed and maintained production-grade web applications using React.js, Next.js, TypeScript, Supabase, and Tailwind CSS
• Designed and implemented Google Calendar synchronization system, including OAuth authentication, token handling, and real-time event syncing

• Integrated Google Cloud Console services, configuring APIs, OAuth consent screens, and domain verification (DNS, TXT records)
• Implemented Google & Apple SSO authentication flows using secure OAuth 2.0 standards
• Built backend integrations using Supabase Edge Functions (Deno) and service-role architecture to bypass RLS constraints securely
• Diagnosed and resolved complex Row-Level Security (RLS) issues affecting cross-user data access in production systems
• Integrated Twilio APIs for communication and notification workflows
• Worked on Azure-based integrations and cloud service connectivity
• Developed browser-based notification system with scheduled alerts and progress tracking logic
• Improved system reliability through error handling, logging, and debugging production issues
• Collaborated in Agile workflows using Jira, contributing to feature planning, sprint delivery, and code reviews
• Optimized UI/UX components and resolved frontend inconsistencies between local and deployed environments
• Assisted in deployment workflows using Vercel, including environment configuration and production debugging

Team Lead & Backend Developer

Zero Logic Space Pvt. Ltd., Nepal
June 2022 – April 2024

• Led development teams and managed project timelines in Agile environments
• Designed scalable backend architectures using Node.js, Express, PostgreSQL, and MongoDB
• Built secure REST APIs and handled database design and optimization
• Mentored junior developers and conducted code reviews
• Managed system integrations and ensured performance and reliability

Front-end Developer

Zero Logic Space Pvt. Ltd., Nepal
April 2019 – June 2022

• Developed responsive user interfaces using React.js and Next.js
• Integrated REST APIs for dynamic applications
• Conducted debugging, testing, and UI performance optimization
• Collaborated closely with UI/UX designers and backend teams

React Native App Developer (iOS)

Zero Logic Space Pvt. Ltd., Nepal
April 2024 – November 2024

• Developed and maintained iOS applications using React Native
• Integrated APIs and optimized application performance
• Performed testing, debugging, and release preparation

Projects & Academic Work

Event Management System – Full Stack Project

Charles Darwin University

• Built a full-stack system using Next.js, TypeScript, Node.js, Express, PostgreSQL
• Implemented authentication using NextAuth and role-based access control
• Developed features including event creation, ticketing, gallery, and admin panel
• Demonstrated system in IT Code Fair 2025

Education

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)
Tribhuvan University, Nepal (2018 – 2022)

Master of Information Technology (Software Engineering) ***(Ongoing)***
Charles Darwin University, Australia

Additional Highlights

• Experience working in real-world SaaS product environments
• Strong understanding of authentication, security, and API integrations
• Hands-on experience with cloud services and production debugging
• Excellent collaboration and communication in remote teams
